DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Pelletier (US PAT # 6,608,891).

Regarding claims 1-2, Pelletier teaches a service control component (reads on SCP 18, Fig. 4 that provides to one or more telephony devices of a plurality of telephony devices on a call, one or more services associated with one or more numbers associated with the one or more telephony devices on the call through employment of one or more data streams associated with the call (this basically reads on the SCP 18 providing service such as announcements and message delivery to customers/callers, see abstract).

Claims 16 and 23 are rejected for the same reasons as discussed above with respect to claims 1-2.

Claims 3-4, 17-19, 22 and 24-26 basically reads on identifying the customer

Art Unit: 2614

calling number and analyzing the entered data streams and based on that providing the required services.

Claim 5 recites “the one or more services comprise one or more routing services, wherein the service control component employs the information to evaluate the one or more routing services; wherein the service control component communicates with a switch component to route the call based on the one or more routing services”. See Fig. 8 and col. 3, lines 52-67.

For claims 6-9, see Fig. 8 and col. 3, lines 52-67.

Claim 10 recites “one or more identifiers comprise one or more addresses associated with one or more of the one or more application server components; wherein the service control component and the one or more of the one or more application server components employ the one or more identifiers to establish the one or more data streams”. See for example Figs. 5-7.

Claims 11-14 are rejected for the same reasons as discussed above with respect to claim 10.

The limitation of claim 15 basically reads on the use on an Internet. See for example the use of an email in col. 4, lines 46-48.

Claim 20 recites "the service control component and the one or more of the one or more switch components employ one or more Transactional Capabilities Application Part (TCAP) queries to associate the identifier with the call". The use of a TCAP messages in an AIN environment is inherent.

Claim 21 is rejected for the same reasons as discussed above with respect to claim 20.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rasha S AL-Aubaidi whose telephone number is (571) 272-7481. The examiner can normally be reached on Monday-Friday from 8:30 am to 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad Matar, can be reached on (571) 272-7488.
